SANMATHI RAMESH

UX/UI Designer | Product Design

+91-8248062108 | sanmathi972@gmail.com | LinkedIn | Portfolio | Chennai, Tamil Nadu, India

PROFESSIONAL SUMMARY

UX/UI Designer with 2 years of experience across enterprise SaaS, fintech, logistics, and publishing, proficient in **Figma**. Skilled in UI design principles, UX processes, product thinking, responsive design, and user-centered design — using **user interviews and usability testing** to simplify complex systems into intuitive experiences. Brings strong creative, analytical, and problem-solving skills to every project, translating user and business needs into meaningful digital solutions while communicating design decisions clearly across product and engineering teams.

CORE SKILLS

UX Research & Strategy

User Research, User Interviews, Usability Testing, A/B Testing, User-Centered Design, Information Architecture, Product Thinking, Stakeholder Collaboration

UI & Interaction Design

Wireframing, Prototyping, Interaction Design, Visual Hierarchy, Design Systems, Design Tokens, Component Libraries, Accessibility Design, Responsive Design, Adaptive Design

AI & Product Design

End-to-End Product Design, AI-Assisted Design Workflows, Vibe Coding, Designing for AI-Powered Products, User Flows, Developer Handoff

Tools & Technical

Figma, Figma Auto Layout, Claude, Figma Make AI, HTML5, CSS3, JavaScript

WORK EXPERIENCE

UX/UI Designer *Feb 2025 – Present*

Revolite Infotech

- Delivered **end-to-end UI/UX** for web and mobile apps across warehouse, fintech, and enterprise SaaS, unifying fragmented tools into role-specific platforms.
- Conducted **user interviews and usability testing** across **6+ product cycles** to shape user flows, wireframes, high-fidelity UI designs, and interactive prototypes aligned with user needs and business objectives.
- Built reusable **component-based design systems**, cutting developer handoff time and reducing UI inconsistencies across modules.
- Used **AI tools and prompt engineering**, including **Claude and Figma Make**, to accelerate ideation, workflows, and creative concept generation.
- Collaborated with **PMs, developers, and stakeholders** in **Agile sprints**, running usability tests each sprint to validate and refine flows before handoff.
- Created **responsive, accessible designs** aligned with usability standards, along with marketing collaterals and brand visuals using **Canva**.

Junior UX/UI Designer *Aug 2024 – Dec 2024*

Ishop Software Solutions

- Delivered **wireframes, prototypes, and high-fidelity designs** directly adopted by developers, reducing **revision cycles** through clear design specifications.
- Created **UI documentation and design guidelines** that improved consistency across subsequent product iterations.

CASE STUDIES & DESIGN WORK

Enterprise Warehouse Management System — *Enterprise SaaS · Logistics & Supply Chain*

- Led UX design to unify **9 fragmented warehouse operations** — returns, invoicing, procurement, HRMS — into a single coherent platform, eliminating role-switching friction and pipeline blind spots for **150+ brands** across **20+ fulfilment centres**.
- Ran **user interviews** with warehouse operators and designed a **task-oriented layout** that prioritized one-tap actions over dashboards, cutting time-to-action for routine tasks.
- Redesigned **Inward, Outward B2C, GRN, Manpower Tracking, and Compliance & Safety** data entry screens, reducing entry errors and surfacing key metrics through dashboards.

Real-Time Budget Burn Cockpit — *Enterprise SaaS · FinTech · AI*

- Designed a **unified platform** for budgets, expenses, procurement, approvals, and vendor spending with **real-time budget visibility**.
- Designed **AI workflows** to detect unusual spending, predict overruns, identify root causes, and recommend cost-saving actions.
- Structured **forecasting, scenario planning, approvals, and reporting** to support faster, data-driven financial decisions.

HealthPassport AI — *Healthcare · AI*

- Designed a **centralized digital health platform** that unifies prescriptions, reports, medications, allergies, vaccinations, and medical history into a **patient-controlled timeline**.
- Designed **secure QR-based, permission-controlled sharing**, allowing patients to selectively share relevant health records with doctors.
- Designed **AI-powered summaries** to turn lengthy medical histories into concise clinical overviews for faster understanding.

Housing Finance — Mobile Application — *FinTech · Mobile*

- Delivered a **self-service Mobile app** for service requests, payments, and documents, reducing branch-visit dependency and **status-related drop-offs**.
- Ran usability testing on the application flow and designed **guided steps** with **inline eligibility checks** and **real-time status visibility** to reduce applicant abandonment.
- Simplified **document uploads** with **guided checklists**, improving completion at the app's highest drop-off point.

D2C Farm Fresh E-Commerce Platform (Web & Mobile) — *E-Commerce · Figma*

- Designed **end-to-end UI/UX** for a farm-to-consumer e-commerce platform including **product discovery, cart, and checkout** flows.
- Developed **wireframes, high-fidelity mockups, and interactive prototypes** to enhance usability, visual consistency, and conversion.
- Ensured **responsive design** across web and mobile interfaces aligned with business goals and **accessibility standards**.

EDUCATION

B.E., Computer Science and Engineering *2019 – 2023*

Anjalai Ammal Mahalingam Engineering College

CGPA: 8.63 / 10
